

CORONET PARTS MANUFACTURING COMPANY INC.

A BRIEF HISTORY

Coronet Parts Mfg. Co. Inc. Is one of the largest manufacturers of flare, compression and pipe fittings in the United States. The company was founded in 1946 as a super distributor, of fittings and accessories, to the automotive aftermarket. In 1951 coronet purchased their largest supplier allowing it to become a prime manufacturer of flared and compression fittings.

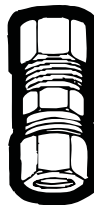

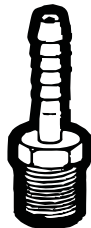

Over the years our physical plant has grown more than five fold. However, it has always remained under one roof. Our modern screw machine facility connects to our warehouse allowing an uninterrupted flow of material to fill our customers needs. This single location philosophy has allowed Coronet to have the **highest fill rate in the industry as well as the quickest turn-around rate.**

Our product line is diverse not only consisting of flare, pipe and compression fittings but a complete line of heavy duty products; as well as valves, lubrication and brake line systems.
